Cattle and crops is a simulation game related to farming activities. The creator and developer of this game are the Masterbrain Bytes GmbH & Co. The publisher of this game is Toplitz. Released for the first time on 9th June 2017 it was an early released tech demo game. The early access to this game was provided on steam on 13th February 2019. The 1.0 version of this game was launched on 15th October 2020. What is the game about? It is a very new generation game that is all about farming simulation. It has been developed with special emphasis on detailing in the game. The engine of this game is based upon the C4 engine developed by Terathon, which has been improvised greatly to be compatible with the necessities of this game. The game can be presently availed only on platforms like Linux, windows. It will soon be available on PS4 and Xbox One shortly. It is the best farming simulation that you will ever come across. It has a very unique design and detailing. There are detailed types of machinery in the game which show real-time physics concepts and several functions. The vehicular controls in this game are very convenient to use. They have versatility functioning and can be controlled with the help of a radio-based menu and a quick navigation bar. Gameplay This game carries you away to the countryside and makes it impressive for you with the insights and concentration on every detail. You can enjoy the complete experience of how farming can be done. You just need to carry out work on the fields with the machines that are available to you and show proper coordination in all the tasks with your co-workers. You can bring in the harvest, care for your animals and maintain the cycle of production of food which will be difficult but can also satisfy the tasks that must be done by a farmer. You just need to keep following your works as a farmer dies with all the challenges that come in your way. Apart from the challenges, you will also come across several good aspects of farming. This includes sowing seeds and harvesting the crops, managing your cattle, using fertilizers, etc. The growth of plants is based on proper nutrition and fertilization. It can be both organic as well as many made. Several grassland tasks must be accomplished by the players. It also comprises handling physical bales, stacking bales, and using a front loader tool to carry them. The game can be played in multiplayer mode. It also features the option of career mode, you can choose it from the menu in the game. However, you might not be able to access any mode you want just at the beginning of the game because the game only allows you to unlock certain modes after you have accomplished the required tasks and reached a higher level in the game. Continue reading this post further to know the amazing features offered by this game. Main Features of the game: Many people want to try farming even it is virtually or in a game. For all such people, the arrival of this game is indeed great news. Not just the gameplay but it also offers some really good features. To know more about these features, read below: It is important that you take proper care of all your crops to make sure that their head doesn't hang down and your fields keep prospering. The growth of plants with the help of the BBCH scale is done based on several characteristics of the soil such as pH value, sunlight hours, moisture, temperature, diseases, and fertilizer. Effective weather mechanism The weather system offered in this game is very effective. It keeps providing you the necessary information that you need to know when the right time to harvest your crops is. This way, it makes sure that your harvest doesn't get wasted. You can harvest your crops only when you are ready. The terrain that is offered to the players while playing this game is very strong and powerful. It allows you to run across the terrain very easily. This terrain is equally good for the growth of crops. You can grow different kinds of crops on this terrain. The graphics that you can find in this game are very attractive and the players can be glued to the game for a very long time once they start playing. The graphics are so distinctive that it helps the players in seeking more and more interest in the game. Another interesting feature of this game is that it offers many new farming tools. These tools are very unique and completely different from the ones that were available in the older versions of this game. You can explore more and more farming tools at each new level in the game. You just need to move ahead in the game while accomplishing the tasks that you are supposed to. The music that keeps playing in the background all the while you keep farming in this game is very suitable to the concept of farming. It completely matches the visual setup of the game. The music is extremely high quality with no lags or pauses. This makes sure that there is no distraction caused in your gaming experience.
